

Transmitter for Analog Current Signals Type G 3210 1161

- AnaLink transmitter with 4 to 20 mA input
- 8-bit resolution
- Optical isolation
- Uses only 1 channel
- Channel coding by GAP 1605
- Supplied by Dupline® and current signal
- H2-housing
- For mounting on DIN-rail in accordance with EN 50022

Product Description

Dupline® AnaLink transmitter with 4 to 20 mA input. Converts the 4 to 20 mA input signal to an 8-bit binary value, which is transmitted to the controller G 3890 0030 230. In this unit the analog values can

be scaled, logged and printed out and/or read from a PC. The 4 to 20 mA signal must be able to supply a voltage drop of 6 V, since the analog part of the transmitter is supplied by the input signal.
